LEADER IN **POLY FILMS & FLEXIBLE** PACKAGING MATERIALS

Neha Convertors is an ISO 9001:2008 certified company based in Gandhinagar, Gujarat (INDIA). Incepted in 1999, the company has thrived under the leadership of Director Mr. R. K. Yadav.

We are a leading manufacturer, exporter and supplier of top of the line packaging solutions for over 18 years specializing in a wide variety of poly films and flexible packaging materials. Our packaging materials are widely used in packing of food & groceries, processed food, FMCG, confectionery, perishable food, detergent, healthcare, tyre & tubes, cement, agriculture and pharmaceutical industry.

We have set up two state-of-the-art automated manufacturing facilities; one in Gandhinagar, Gujarat, and another in Jalesar, Uttar Pradesh. Having knack for precision, we offer total customization – be it in terms of thickness of material or printing of colours. To raise the bar of quality of our offerings, we only use best quality inks and base material, and ensure high accuracy of printing that brings out every colour with precision. We constantly upgrade our machineries & adapt new technology for better results.

So, if you want your products to have packaging that attracts attention and dives off the shelf...Neha Convertors can be your trusted partner.

VISION

To become a national leader in manufacturing of poly films and flexible packaging materials by adhering to highest standards of quality and client satisfaction and set new benchmarks in packaging solutions.

SOLUTIONS THAT PACK A PUNCH

We manufacture poly films and flexible packaging materials of varying thickness – all grades up to 1400 mm – which are used in diverse industrial applications and in packing of a wide assortment of products. All our products are available at economical prices and we have capabilities and strength to fulfil small as well as bulk orders with the confirmation of punctual delivery.

We are equipped with rotogravure printing technology for high performance printing. We also offer high definition printing solutions for surface printing as well as polyester & metalized polyester printing and can do printing up to 8 colours.

Our products are available in desired size, shape, colours, design, thickness and film combinations, and embody following properties at large.

- ◆ **Highly durable**
- ◆ **Eye-catchy printing quality & elegant finish**
- ◆ **Moisture resistance**
- ◆ **Heat resistance**
- ◆ **Leak & puncture proof**
- ◆ **Gas barrier properties**

OUR TOP OF THE LINE PRODUCTS

Printed Laminated Pouches & Rolls

We offer a wide variety of printed laminated pouches which includes center seal pouches, three side seal pouches, 4 and 6 side seal pouches, stand up pouches with zipper, spout pouches, shape pouches, multilayer pouches, PET poly pouches, sealed stand up pouches, gazetted pouches and reusable pouches.

Applications

Our printed laminated pouches and rolls are widely used in diverse industries for packing of food & processed food, spices, confectionery items, agricultural products, snacks, dry fruits, cosmetics and pharmaceuticals products.

PET / PVC Shrink Sleeve

We manufacture, supply and export high quality PET / PVC shrink sleeves which are acknowledged for their lasting bonding.

Applications

Our heat shrinkable PET / PVC sleeves are used for labelling of PET and HDPE bottles and jars.

BOPP Printed Woven Sack Bags

Our multicolour printed BOPP woven sack bags are available in HDPE/PE lamination. These bags are precisely woven, light in weight, easy to handle and resistant to chemical and fungal growth.

Applications

Our BOPP bags are excellent for packaging of wide variety of crop seeds, grains, pulses, pet food and animal feed.

Blister PVC Printed Laminated Rolls

We manufacture blister PVC printed laminated rolls from superior grade raw material which assures lightweight, excellent finish and precision in print.

Applications

Our PVC printed laminated rolls are widely used for the packaging of confectionery, cosmetics, garments, chocolates and other products.

Reusable Handle Bags

We manufacture durable and easy to carry reusable handle bags with rope handle or finger grip handle.

Applications

Our reusable handle bags are extensively used for packing of grains, pulses, grocery items and pet feed.

Multilayer Co-extruded Film

Multiple films layered by co-extrusion offer many advantages in packaging such as heat sealing capabilities, heat & cold resistance, rigidity, flexibility and easy-peel capabilities.

Applications

Our multilayer co-extruded films offer valuable application in food packing, medical device packing, transfusion bags and industrial materials.

LDPE Shrink Film

We offer LDPE shrink films which are recyclable and have high shrink potential. Our LDPE shrink films promise ease of product handling and distribution and reduce packing material cost.

Applications

Our LDPE shrink films are used for wrapping of healthcare products, beauty products, glass bottles, cans, tins, beverages, tetra packs, cartons, consumer durables, stationery and a variety of other products.

*Brands shown are only for product demonstration. Some of them may not be catered by us.

Mulching Agriculture Film

Mulching film is a boon for agriculture. Our high quality mulching films help retaining soil moisture, managing weed, reducing leaching of nutrients, improving crop quality and offer many more benefits.

Applications

Mulching film is applied to the soil surface, around trees, paths, flower beds, on slopes to prevent soil erosion, and in production areas for flower and vegetable crops.

Silicone Liners & Void Tapes

We produce highly reliable silicone coated films which reduce surface slip, prevent abrasion and scratching during manufacturing, and impede damage during delivery cycle. We offer silicone coated films with custom printing and slitting.

Applications

Silicone coating can be applied to polyester, paper and various other products. Our silicone coated films are widely used in pressure sensitive adhesive applications as a carrier film, and also used as a liner in label stock, gum sheet and foam tape industries.

Easy Peel Films

When it comes to food packaging, easy peel films are cost-effective compared to plastic lid. We manufacture easy peel films which are non-sticky, soft to peel off, functions well under different weather conditions.

Applications

Our easy peel films offer reliable application for packing of fruits, food and beverages available in cups and containers.

Tetra pack

We manufacture attractive and high quality tetra packs that keep milk and beverages fresh for a long time and entice customers.

Applications

Our tetra packs are good for packaging of milk, buttermilk, beverages, soft drinks, coconut water, and fruit juices.

COMPETENCIES DRIVING OUR PROGRESS

STATE OF THE ART INFRASTRUCTURE

- ◆ Extrusion machine of Kabra Extrusion Technik
- ◆ Fully automated 8 colour printing machine with auto registration
- ◆ High speed solventless and base lamination machine
- ◆ High speed slitting machine
- ◆ Pouching machine for manufacturing of variety of pouches
- ◆ PVC shrink sleeves gluing and cutting machine
- ◆ Fully equipped testing laboratory

We are committed to ensure that all our products meet the highest quality standards and fulfil customer expectations. Products are meticulously inspected at each stage of manufacturing and are dispatched only after satisfactorily tested. To carry out all the tests, our in-house laboratory is fully equipped with:

-

Our quality and service promised are backed by a team of expert and experienced professionals. Abreast with latest know-how of packaging industry and having years of experience, our team leave no stones unturned to meet precise client requirements and deliver international standard products.

We have installed rotogravure printing machines to ensure consistency in printing. Rotogravure printing involves engraving the image on the cylinder directly onto the image carrier. This process allows ink to settle on the substrate with precision.

- ◆ Fast printing & less wastage
- ◆ High efficiency & precision printing
- ◆ Reduces cost of printing for bulk order
- ◆ Maintains uniformity of printing
- ◆ Brings out colours accurately
- ◆ Versatile printing suitable for paper, plastic film, cardboard, laminates and more

We have experience of serving more than 500 small to large scale clients from diverse industries and from various countries. Our clients have continuously placed their trust in us for our quality products and professional services.
